

Morquio B and GM1 gangliosidosis (juvenile and late-onset) community: We want to hear from you!

Principal Investigator: Dr. Sylvia Stockler

March-May
2024

About Our Study.

We are investigating medical symptoms and well-being for people with Morquio B and Juvenile (Type II) and Late-Onset (Type III) GM1 gangliosidosis.

Join us by participating in online focus groups to share with us which outcomes are most important to you.

How Can You Participate ?

Fill out our short form to see if you are eligible to participate (link)

Paid Participation

You will be compensated for your participation with a \$100 (USD) Amazon online gift card.

MORQUIO B AND GM1 GANGLIOSIDOSIS (JUVENILE AND LATE-ONSET)

FOCUS GROUPS

- Are you a person diagnosed with or someone caring for a person with Morquio B Disease or Juvenile (Type II) and Late-Onset (Type III) GM1 gangliosidosis?
- Are you interested in discussing challenges and expectations for future treatments?
- Do you have a stable internet connection?
- Are you comfortable with English?

If you answered yes to all four,
recruitment for focus groups
takes place in **March-May!**

Engage and share your
experiences with your
community in a safe space
