

Are you pregnant?

You are invited to be part of our nutrition study at BC Children's Hospital.

The study will be in:

Determining the amino acid tryptophan dietary requirements during pregnancy.

The study involves:

- A one-hour pre-study assessment day, to assess eligibility and 8-hour study day(s).
- You will have a designed diet, and we will mainly collect breath, urine, one blood sample.

You can participate if you are:

- Healthy pregnant cis-gender women.
- 20 – 40 years old.
- Pregnant with one baby.
- Between 11 – 20 weeks or 31 – 40 weeks of pregnancy.

Location: BC Children's Hospital.

Principal Investigator:
Dr. Rajavel Elango.

Primary Contact:
Noof AlMansoori

noof.almansoori@bcchr.ca

Your participation is valuable!

Financial compensation will be provided.

Study Start: July 2023 – Study End April 2025
