

Are you 14 to 25 years old and have received a solid organ transplant?

Transplant Text Messaging Study

WE NEED YOUR HELP

We are seeking participants for a study exploring youth and young adult transplant recipient perspectives on the use of a text-message based education platform.

Our group wants to know what kind of information would help youth and young adults feel confident about managing their transplant care, and how they would like to receive this information through text-messaging.

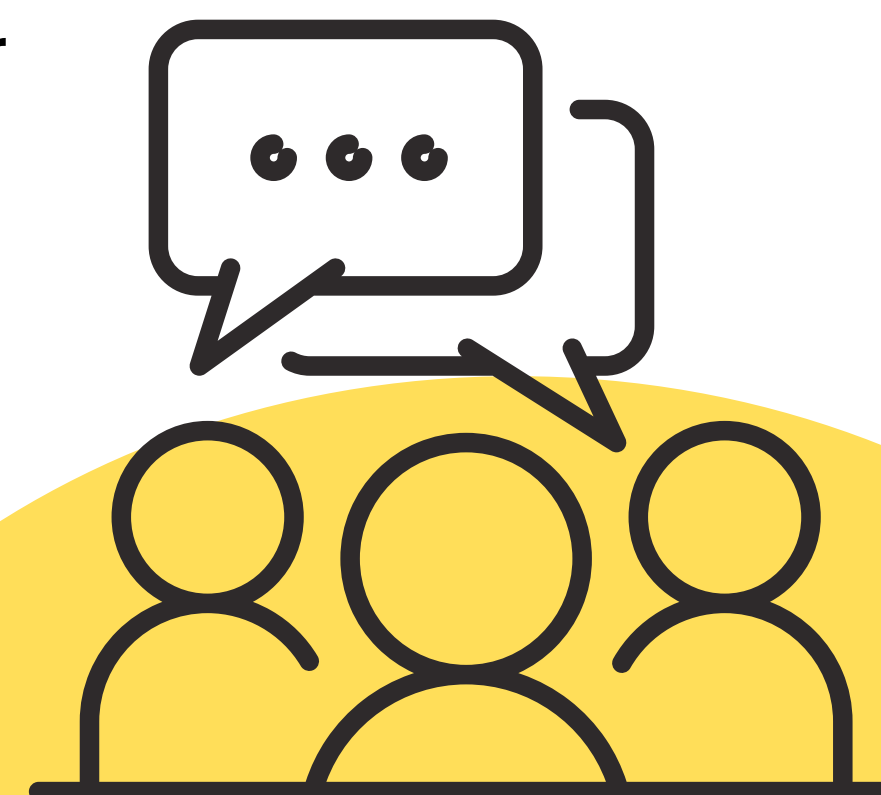

This information will help us to create a new text-messaging based resource for transplant recipients and their families.

WHAT WILL YOU HAVE TO DO?

Complete a **45 minute** interview over the phone or Zoom about your experience learning about transplant care and using text-messaging for learning.

WHO CAN PARTICIPATE?

- Youth and young adults (aged 14 to 25 years) who have received a solid organ transplant (kidney, liver, lung, or heart)

Questions?

Contact the investigator at kathryn.haubrich@cw.bc.ca

We hope to hear from you!
