

Exhibit 1

TOPIC: PSYCH

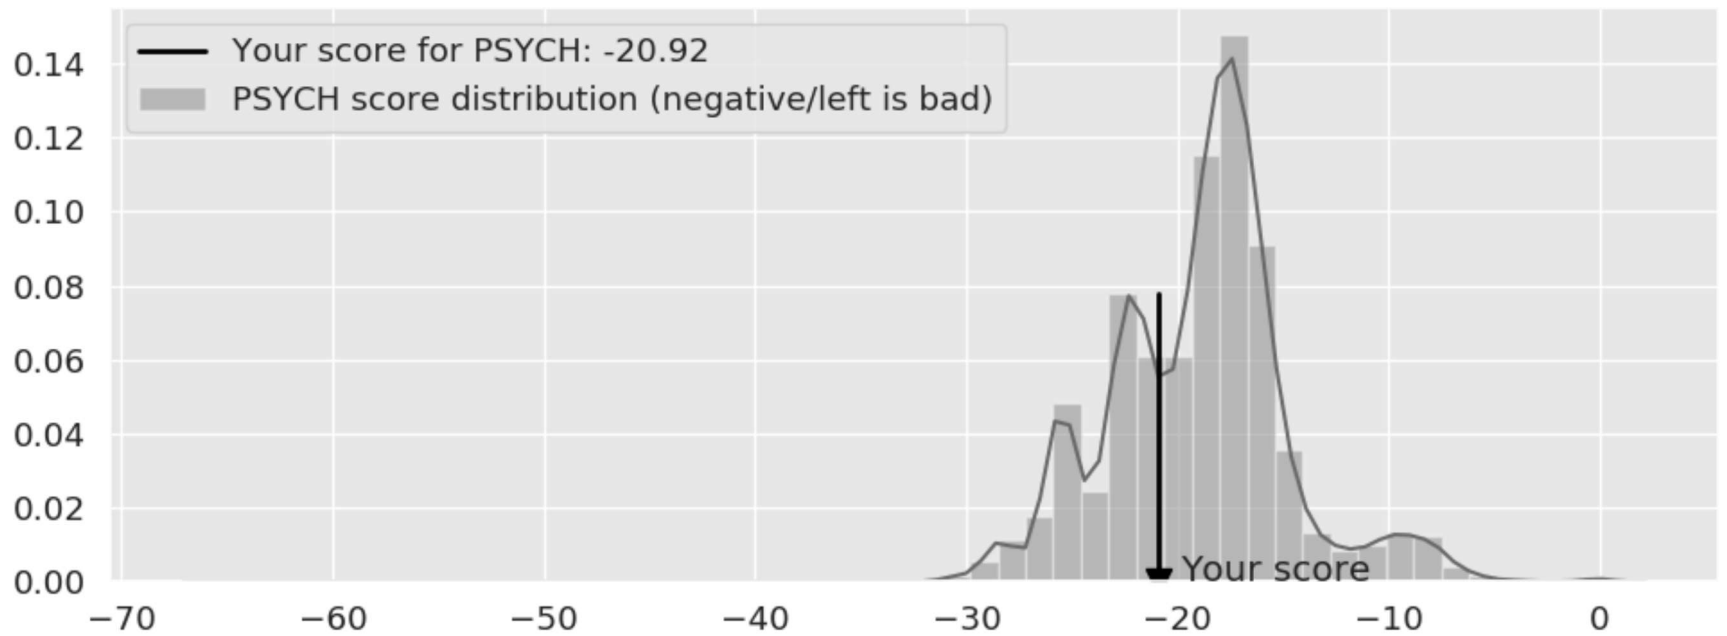

Exhibit 2: Explaining development of psychiatric illness

Exhibit 2 cont'd: Explaining development of psychiatric illness

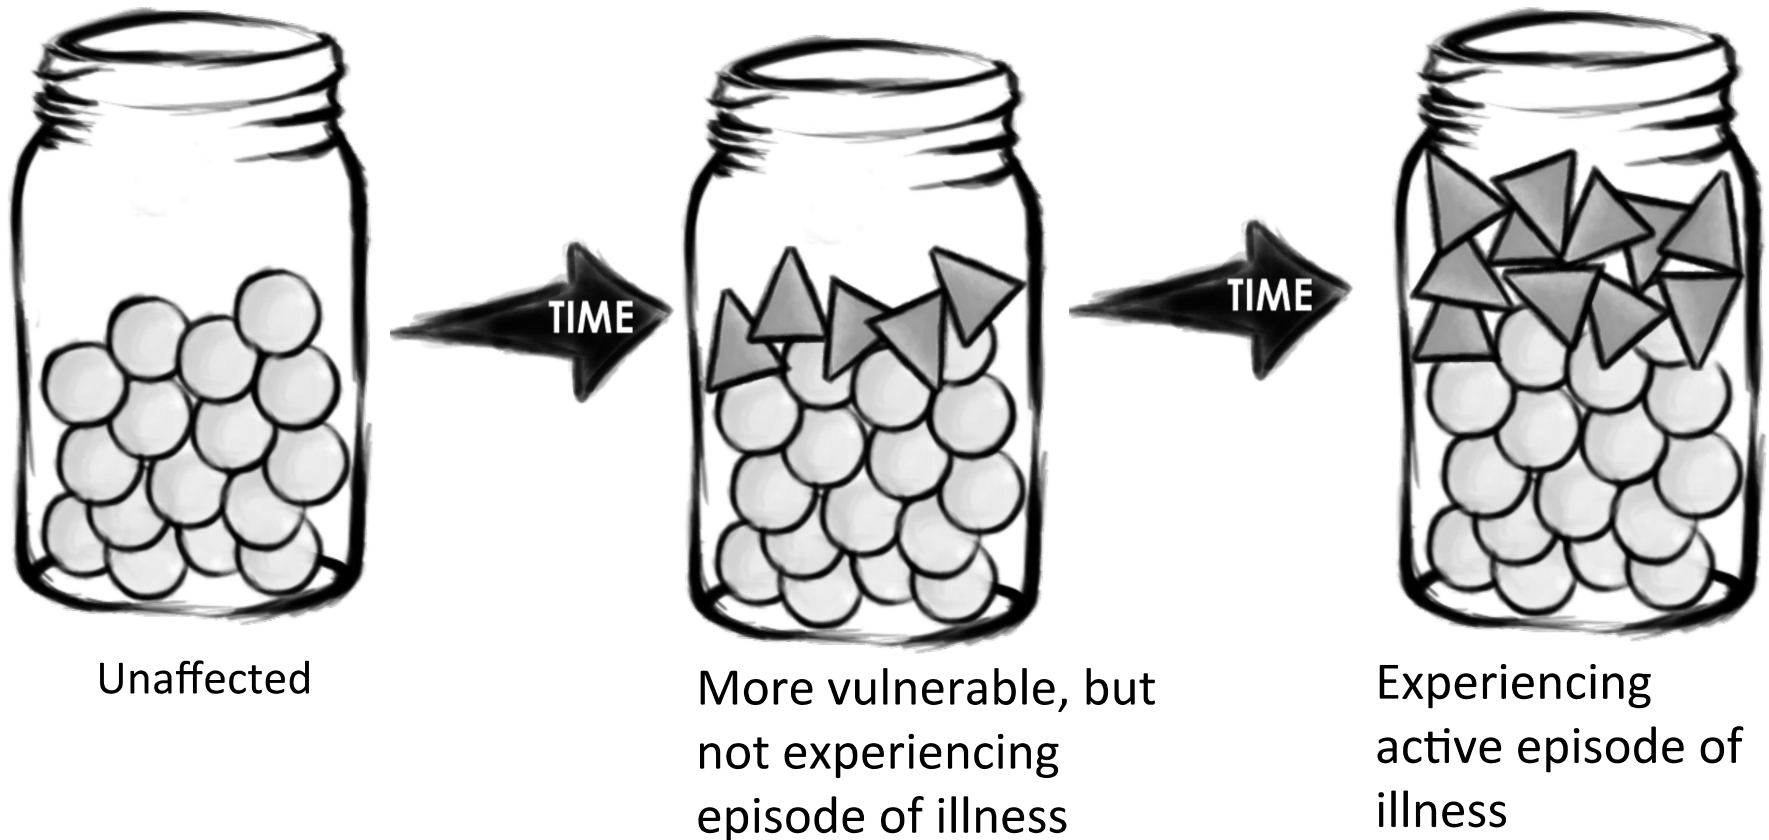

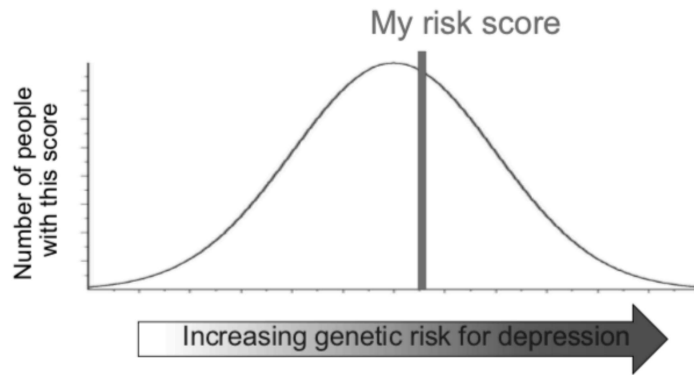

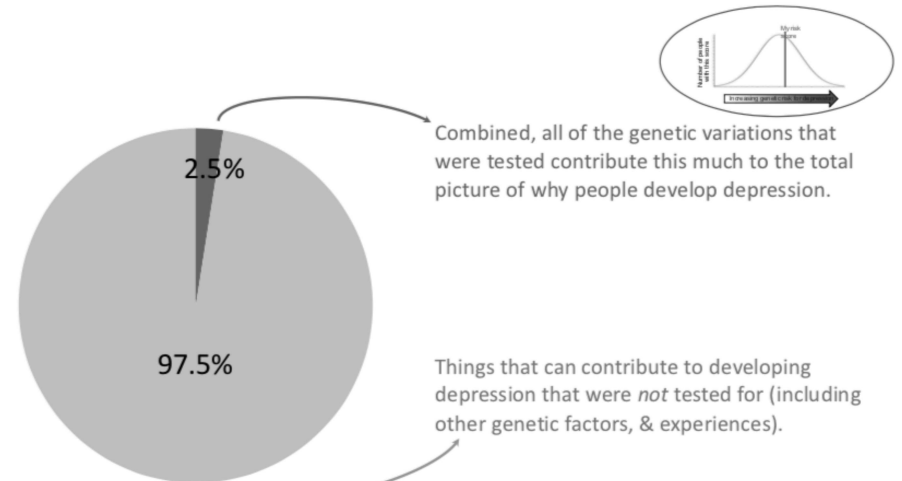

Exhibit 2 continued

My genetic risk score for depression

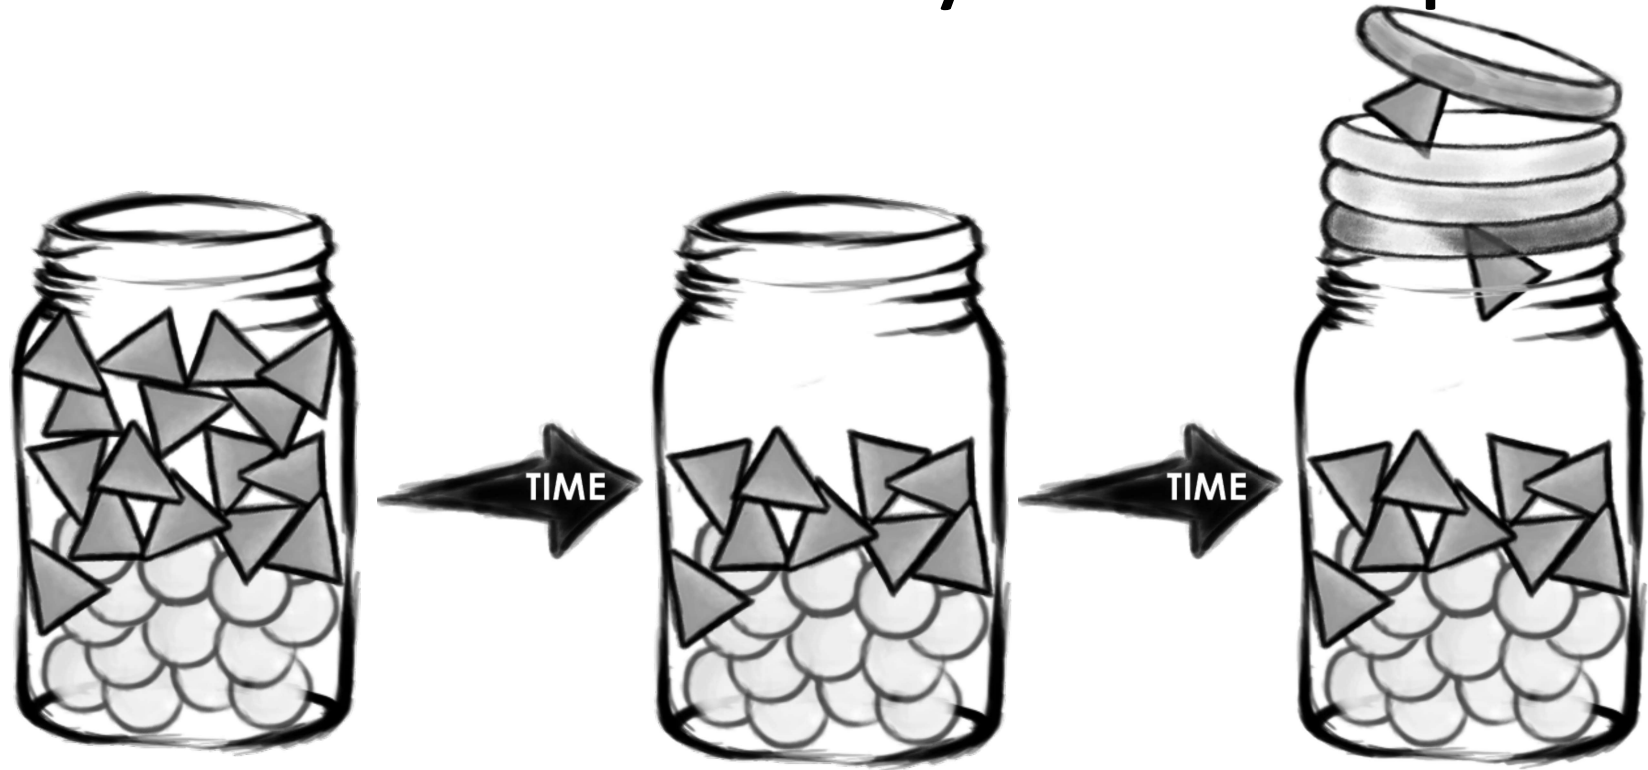

This is how your genetic risk - according to the variations tested - compares to others' risk from testing the same set of variations

Pie chart representing the information that was provided by your genetic test in relation to *all* of the factors (including genetic & environmental) that can contribute to developing depression

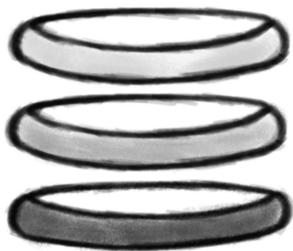

Exhibit 3: Recovery and Relapse

Experiencing an active episode of illness

Vulnerable, but not actively ill

Less likely to relapse

Protective factors
